

Setting  $P = 25 \text{ kN}$  & solving numerically.

External Forces

$$A_x = 0$$

$$A_y = B_y = 8.\overline{33} \text{ kN}$$

Internal Forces

$$^1AD = 13\frac{8}{9} = 13.889 \text{ kN (T)}$$

$$^2AE = -11\frac{1}{9} = -11.111 \text{ kN (C)}$$

$$^3DE = 20.031 \text{ kN (T)}$$

$$^4CD = 0 \text{ kN}$$

$$^5CE = -20.031 \text{ kN (C)}$$

$$^6BC = -13.889 \text{ kN (C)}$$

$$^7BE = 11.111 \text{ kN (T)}$$
