

5 pins needed

$$5 \cdot 0.0218 = 0.109 \text{ Kg}$$

~~Weight total~~ $\cancel{8.0655 \text{ Kg}} = \cancel{0.3275 \text{ Kg}}$ For all pins

Total weight of the truss
= weight_{beams} + weight_{pins}

$$\cancel{= 8.138 \text{ Kg} + 0.3275 \text{ Kg} = 8.4655 \text{ Kg}}$$

Total truss
weight

$$= 8.138 \text{ Kg} + 0.109 \text{ Kg} = 8.247 \text{ Kg}$$
